Ok. So, you feel that is the right way to characterize all this. I don't want to push you into anything. The synergy thing just seemed awfully negative especially since we have not really been able to get this organized given everything else we have had on our plate.

Subject: FW: Board decks - final steps
Importance: High

Meg,

Attached is the deck for the Board calls this week. Note that the impairment charge is now about \$8.8B given the additional synergies in Autonomy. The synergies added drive a larger market cap recon delta of about \$3.6B; the remaining \$5.2B in impairment is made up of 'misrepresentation-related or other non-disclosed information' lost value and lower/ later in time synergies. Note that at the time we offered to buy Autonomy they were trading at \$6.5B and given the 'fraud or misrepresentation' they would like have been trading well below that. Without the misleading financials, I would guess it was no more than \$3-4B using a comparable revenue multiple to Tibco or Informatica, both growing similarly to Autonomy re-baselined.

Cathie,

Here is the draft of the deck we were planning to discuss right now.

Thanks,

Erin

I would go with 16%.

Value at 17% rate is \$2B even (impairment \$9 billion)

Value at 16% rate is \$2.2B (impairment \$8.8 billion)

Cathie, what are your thoughts. Align Autonomy risk premium with ES (17% rate) or with PSG/IPG (16% rate).

Thanks,

Meeta

Team,

Apologies, we are still waiting on numbers from D&P. Will send as soon as I have them—hopefully within the next half hour. Next steps:

1) Cathie, I'll need you to sign off on final Autonomy value when I receive numbers. I am going to give you one at a 16% rate and one at a 17% rate – I can make either work with the market cap analysis. Discount rate premiums are as follows:

Software	3ppt	
ESSN and TS	3.5ppt	
IPG and PSG	5ppt	
ES and Autonomy	6ppt	(This is Autonomy at 17%)

With 17%, ES and Autonomy have same risk weighting (6ppt) and with 16%, Autonomy has same risk weighting as PSG/IPG.

- 2) Once we have final value we can make changes in both decks and send out to this group for one last pass
- 3) Cathie will send to John Shultz for posting tonight

Thanks,

Meeta
